Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 223

A.c. susceptibility measurements
the preparation and characterization of a new layered yttrium nickel borocarbide, 53
Actinides
comparative solution chemistry of the 4f and 5f elements, 174
comparative science of the lanthanide and actinide (lanact) halides, 180
comparison of the chemical and physical properties of f-element metals and oxides: their dependence on electronic properties, 185
comparison of the electronic structure of the lanthanides and actinides, 197
from the transition metals to the rare earths – via the actinides, 204
synchrotron X-ray absorption spectroscopy: a new tool for actinide and lanthanide speciation in solids and solution, 274
Actinide solids
systematics in lanthanide and actinide solids, 165
Adsorption
poisoning by air of AB_5 type rare-earth nickel hydrogen-absorbing alloys, 60
the confinement of hydrogen in $LaNi_5$ by poisoning of the hydride surface, 122
Amorphous transition metal alloys
amorphous La–Ni thin film electrodes, 6
An-monopnictides
comparison between Ce-monopnictides and An-monopnictides: strong mixing effect, 251
Annealing
identification of a faulted carbide phase in an annealed $Nd_{10}Dy_6Fe_{76}B_1C_7$ cast magnet, 18
Auger studies
behaviour of interstitial impurities on the surface of yttrium during solid state electrotransport: Auger studies, 91

Ball-milling
electrochemical properties of $TiMn_2$-type alloys ball-milled with nickel powder, 1
Boron suboxide
a new route for the synthesis of boron suboxide B_7O, L7

Calcium
crystal structure of Ag_7Ca_2 – a new intermetallic structure type, 65
comparative study of some rare earth sulfides: doped γ-$[A]M_2S_3$ (M = La, Ce and Nd, A = Na, K and Ca) and undoped γ-M_2S_3 (M = La, Ce and Nd), 130
Carbon dioxide
methanation of carbon dioxide over $LaNi_4X$-type intermetallic compounds as catalyst precursor, 139
Carbon monoxide
the confinement of hydrogen in $LaNi_5$ by poisoning of the hydride surface, 122

Cast magnets
identification of a faulted carbide phase in an annealed $Nd_{10}Dy_6Fe_{76}B_1C_7$ cast magnet, 18
Catalysis
methanation of carbon dioxide over $LaNi_4X$-type intermetallic compounds as catalyst precursor, 139
Cathodic hydrogen storage
Zr–Ti–V–Ni alloys with dendrite-free structure, 32
Cathodoluminescence
effects of crystallinity on the luminescence of ZnS:Tb,P powder and film, 154
Ce-monopnictides
comparison between Ce-monopnictides and An-monopnictides: strong mixing effect, 251
Cerium
mixed-ligand solid state complexes of cerium with bis-(2-ethyl-hexyl) phosphoric acid, 118
Chemical behaviour
comparative solution chemistry of the 4f and 5f elements, 174
Cobalt
magnetic properties of $LaCo_{5-x}Ni_x$, 70
on the electronic properties of $YCo_{5-x}Ni_x$, 147
variation in transformation hysteresis in pure cobalt with transformation cycles, L1
Compressibility
comparative aspects of the high-pressure behaviour of lanthanide and actinide compounds, 216
Crystal field
comparison of the electronic structure of the lanthanides and actinides, 197
Crystal field parameters
^{155}Gd Mössbauer investigation of the compound $GdPd_2Al_3$, 127
Crystal growth
crystal growth of the high-pressure phase of Mg_2Sn, 74
Crystallinity
effects of crystallinity on the luminescence of ZnS:Tb,P powder and film, 154
Crystallographic space groups
comparison of the frequencies of crystallographic space groups in organo-lanthanide and -actinide compounds, 280
Crystal structures
synthesis and crystal structure of $K_2CuP_2O_7$, 13
subsolidus phase relations of the La–Co–Cu system and crystal structure of $LaCoCu_{12}$, 45
crystal structure of Ag_7Ca_2 – a new intermetallic structure type, 65
properties of Gd_3T compounds (T = Rh, Ir, Pd), 87
some physical properties of the perovskite-like phases $AlSr_2LnCu_2O_7$, 151
structural systematics of 4f and 5f elements under pressure, 170

Elsevier Science S.A.

comparative science of the lanthanide and actinide (lanact) halides, 180
crystal and electronic structure connections between the 4f and 5f transition metals, 211
Cuprates
some physical properties of the perovskite-like phases $AlSr_2LnCu_2O_x$, 151
Cyclic stability
improved low-temperature dischargeability of C14-type Zr–Cr–Ni Laves phase alloy, 22

D–A pair emission
effects of crystallinity on the luminescence of ZnS:Tb,P powder and film, 154
Defect structure
X-ray diffraction investigation of the defect pyrochlore $Bi_{1.61}Zn_{0.18}Ti_{1.94}V_{0.06}O_{6.62}$, 142
Dendrite-free structure
Zr–Ti–V–Ni alloys with dendrite-free structure, 32
Differential thermal analysis
crystal growth of the high-pressure phase of Mg_2Sn, 74
phase boundaries in the PdGe–PtGe and Pd_2Ge–Pt_2Ge subsystems, 97
Dysprosium
Mössbauer studies on the volume stability of f-electron configurations, 242

Electric properties
some physical properties of the perovskite-like phases $AlSr_2LnCu_2O_x$, 151
Electrochemical characteristics
electrochemical characteristics of $LaNi_{4.7}Al_{0.3}$ alloy activated by alkaline solution containing hydrazine, 28
Zr–Ti–V–Ni alloys with dendrite-free structure, 32
Electrochemical properties
electrochemical properties of $TiMn_2$-type alloys ball-milled with nickel powder, 1
Electroluminescence
effects of crystallinity on the luminescence of ZnS:Tb,P powder and film, 154
Electronic configurations
structural systematics of 4f and 5f elements under pressure, 170
Electronic nature
comparison of the chemical and physical properties of f-element metals and oxides: their dependence on electronic properties, 185
Electronic properties
on the electronic properties of $YCo_{5-x}Ni_x$, 147
Electronic structure
comparison of the electronic structure of the lanthanides and actinides, 197
crystal and electronic structure connections between the 4f and 5f transition metals, 211
bulk and surface electronic structure of lanthanide metals, 265
Electronic transition versus colour
comparative study of some rare earth sulfides: doped γ-[A]M_2S_3 (M = La, Ce and Nd, A = Na, K and Ca) and undoped γ-M_2S_3 (M = La, Ce and Nd), 130
Electron spin resonance
influence of manganese concentration on the ESR spectrum of Mn^{4+} in rutile, 115
Electron structure
Mössbauer studies on the volume stability of f-electron configurations, 242
Europium
Mössbauer studies on the volume stability of f-electron configurations, 242

Faulted carbide phase
identification of a faulted carbide phase in an annealed $Nd_{10}Dy_6Fe_{76}B_1C_7$ cast magnet, 18
f-Elements
mixed condensed f-element clusters, 160
comparison of the chemical and physical properties of f-element metals and oxides: their dependence on electronic properties, 185
Formula volumes
comparative science of the lanthanide and actinide (lanact) halides, 180

Gadolinium
bulk and surface electronic structure of lanthanide metals, 265
Germanium
phase boundaries in the PdGe–PtGe and Pd_2Ge–Pt_2Ge subsystems, 97

Halides
comparative science of the lanthanide and actinide (lanact) halides, 180
High pressure
crystal Structure of UAl_2 above 10 GPa at 300 K, 49
High-pressure behaviour
comparative aspects of the high-pressure behaviour of lanthanide and actinide compounds, 216
High-pressure phase
crystal growth of the high-pressure phase of Mg_2Sn, 74
Hydration
comparative solution chemistry of the 4f and 5f elements, 174
Hydrazine
electrochemical characteristics of $LaNi_{4.7}Al_{0.3}$ alloy activated by alkaline solution containing hydrazine, 28
Hydride electrodes
characteristics of the stoichiometric and non-stoichiometric Laves phase alloys and their hydride electrodes, 77
Hydride formations
study of the formation of α-U_2N_{3+x} using unstable ammonia, 39
Hydrides
the confinement of hydrogen in $LaNi_5$ by poisoning of the hydride surface, 122
Hydrogen
poisoning by air of AB_5 type rare-earth nickel hydrogen-absorbing alloys, 60
Hydrogen absorption
hydrogen absorption and desorption characteristics of mechanically milled Mg–35wt.%$FeTi_{1.2}$ powders, 111
Hydrogenation
methanation of carbon dioxide over $LaNi_4X$-type intermetallic compounds as catalyst precursor, 139
Hydrogen desorption
thermally stimulated hydrogen desorption from zirconium and tantalum, 81
hydrogen absorption and desorption characteristics of mechanically milled Mg–35wt.%$FeTi_{1.2}$ powders, 111
Hydrogen storage
amorphous La–Ni thin film electrodes, 6
the confinement of hydrogen in $LaNi_5$ by poisoning of the hydride surface, 122

Infrared spectroscopy
structure of $KNaReH_6$ by single crystal X-ray diffraction and infrared spectroscopy, L4

Intermetallic compounds
methanation of carbon dioxide over $LaNi_xX$-type intermetallic compounds as catalyst precursor, 139
Interstitial impurities
behaviour of interstitial impurities on the surface of yttrium during solid state electrotransport: Auger studies, 91
IR spectra
mixed-ligand solid state complexes of cerium with bis-(2-ethyl-hexyl) phosphoric acid, 118

Lanthanide clusters
mixed condensed f-element clusters, 160
Lanthanide metals
bulk and surface electronic structure of lanthanide metals, 265
Lanthanides
comparative solution chemistry of the 4f and 5f elements, 174
comparative science of the lanthanide and actinide (lanact) halides, 180
comparison of the chemical and physical properties of f-element metals and oxides: their dependence on electronic properties, 185
comparison of the electronic structure of the lanthanides and actinides, 197
synchrotron X-ray absorption spectroscopy: a new tool for actinide and lanthanide speciation in solids and solution, 274
Lanthanide solids
systematics in lanthanide and actinide solids, 165
Lattice defects
variation in transformation hysteresis in pure cobalt with transformation cycles, L1
Laves phase alloys
improved low-temperature dischargeability of C14-type Zr–Cr–Ni Laves phase alloy, 22
characteristics of the stoichiometric and non-stoichiometric Laves phase alloys and their hydride electrodes, 77
Laves phases
crystal Structure of UAl_2 above 10 GPa at 300 K, 49
Layered borocarbides
the preparation and characterization of a new layered yttrium nickel borocarbide, 53
Low-temperature dischargeability
improved low-temperature dischargeability of C14-type Zr–Cr–Ni Laves phase alloy, 22

Magnetic behaviour
neutron diffraction study of the ferromagnetic to antiferromagnetic transition in $La_{0.3}Y_{0.7}Mn_2Ge_2$: phenomenological description of the magnetic behaviour of Mn in $ThCr_2Si_2$ silicides and germanides, 101
Magnetic order
comparison of structure and magnetic properties of the 4f and 5f electron $ThMn_{12}$-type ternary aluminides, 237
Magnetic properties
magnetic properties of $LaCo_{5-x}Ni_x$, 70
properties of Gd_3T compounds (T = Rh, Ir, Pd), 87
comparison of structure and magnetic properties of the 4f and 5f electron $ThMn_{12}$-type ternary aluminides, 237
Magnetic susceptibility
magnetic studies on Mn-substituted Y–Ba–Cu–O, 56
Magnetism
some physical properties of the perovskite-like phases $AlSr_2LnCu_2O_z$, 151
the magnetism of localized or nearly localized 4f and 5f shells, 226
Manganese
neutron diffraction study of the ferromagnetic to antiferromagnetic transition in $La_{0.3}Y_{0.7}Mn_2Ge_2$: phenomenological description of the magnetic behaviour of Mn in $ThCr_2Si_2$ silicides and germanides, 101
Manganese concentrations
influence of manganese concentration on the ESR spectrum of Mn^{4+} in rutile, 115
Martensitic transformation
variation in transformation hysteresis in pure cobalt with transformation cycles, L1
Mechanical milling
hydrogen absorption and desorption characteristics of mechanically milled Mg–35wt.%$FeTi_{1.2}$ powders, 111
Metals
comparison of the chemical and physical properties of f-element metals and oxides: their dependence on electronic properties, 185
Monochalcogenides
the magnetism of localized or nearly localized 4f and 5f shells, 226
Monopnictides
the magnetism of localized or nearly localized 4f and 5f shells, 226
Mössbauer investigations
^{155}Gd Mössbauer investigation of the compound $GdPd_2Al_3$, 127
Mössbauer studies
Mössbauer studies on the volume stability of f-electron configurations, 242

Neptunium
Mössbauer studies on the volume stability of f-electron configurations, 242
Neutron diffraction
neutron diffraction study of the ferromagnetic to antiferromagnetic transition in $La_{0.3}Y_{0.7}Mn_2Ge_2$: phenomenological description of the magnetic behaviour of Mn in $ThCr_2Si_2$ silicides and germanides, 101
Nickel
electrochemical properties of $TiMn_2$-type alloys ball-milled with nickel powder, 1
magnetic properties of $LaCo_{5-x}Ni_x$, 70
Nitrogen activity
study of the formation of α-U_2N_{3+x} using unstable ammonia, 39

Optical spectra
comparison of the electronic structure of the lanthanides and actinides, 197
Orbital polarization
on the electronic properties of $YCo_{5-x}Ni_x$, 147
Organo-actinides
comparison of the frequencies of crystallographic space groups in organo-lanthanide and -actinide compounds, 280
Organo-lanthanides
comparison of the frequencies of crystallographic space groups in organo-lanthanide and -actinide compounds, 280
Oxides
comparison of the chemical and physical properties of f-element metals and oxides: their dependence on electronic properties, 185

Palladium
phase boundaries in the PdGe–PtGe and Pd_2Ge–Pt_2Ge subsystems, 97
Phase boundaries
phase boundaries in the PdGe–PtGe and Pd_2Ge–Pt_2Ge subsystems, 97

Phase relations
crystal growth of the high-pressure phase of Mg_2Sn, 74
Phase transition
crystal Structure of UAl_2 above 10 GPa at 300 K, 49
Phosphates
synthesis and crystal structure of $K_2CuP_2O_7$, 13
Platinum
phase boundaries in the PdGe–PtGe and Pd_2Ge–Pt_2Ge subsystems, 97
Poisoning
the confinement of hydrogen in $LaNi_5$ by poisoning of the hydride surface, 122
Poisoning behaviour
poisoning by air of AB_5 type rare-earth nickel hydrogen-absorbing alloys, 60
Potassium
comparative study of some rare earth sulfides: doped γ-$[A]M_2S_3$ (M = La, Ce and Nd, A = Na, K and Ca) and undoped γ-M_2S_3 (M = La, Ce and Nd), 130
Preparation
the preparation and characterization of a new layered yttrium nickel borocarbide, 53
Pressure
structural systematics of 4f and 5f elements under pressure, 170
Pyrochlore
X-ray diffraction investigation of the defect pyrochlore $Bi_{1.61}Zn_{0.18}Ti_{1.94}V_{0.06}O_{6.62}$, 142

Quadrupole splitting
^{155}Gd Mössbauer investigation of the compound $GdPd_2Al_3$, 127

Rare earth metals
methanation of carbon dioxide over $LaNi_4X$-type intermetallic compounds as catalyst precursor, 139
Rare earths
from the transition metals to the rare earths – via the actinides, 204
comparison between Ce-monopnictides and An-monopnictides: strong mixing effect, 251
Refrigeration system
poisoning by air of AB_5 type rare-earth nickel hydrogen-absorbing alloys, 60
Rutile
influence of manganese concentration on the ESR spectrum of Mn^{4+} in rutile, 115

Silver
crystal structure of Ag_7Ca_2 – a new intermetallic structure type, 65
Single crystal X-ray diffraction
structure of $KNaReH_9$ by single crystal X-ray diffraction and infrared spectroscopy, L4
Sodium
comparative study of some rare earth sulfides: doped γ-$[A]M_2S_3$ (M = La, Ce and Nd, A = Na, K and Ca) and undoped γ-M_2S_3 (M = La, Ce and Nd), 130
Solid state complexes
mixed-ligand solid state complexes of cerium with bis-(2-ethylhexyl) phosphoric acid, 118
Solid state electrotransport
behaviour of interstitial impurities on the surface of yttrium during solid state electrotransport: Auger studies, 91
Subsolidus phase relations
subsolidus phase relations of the La–Co–Cu system and crystal structure of $LaCoCu_{12}$, 45
Superconductors
magnetic studies on Mn-substituted Y–Ba–Cu–O, 56
Synthesis
a new route for the synthesis of boron suboxide B_7O, L7
synthesis and crystal structure of $K_2CuP_2O_7$, 13
Systematics
systematics in lanthanide and actinide solids, 165
structural systematics of 4f and 5f elements under pressure, 170

Tantalum
thermally stimulated hydrogen desorption from zirconium and tantalum, 81
Thermal hysteresis
variation in transformation hysteresis in pure cobalt with transformation cycles, L1
Thermal stimulation
thermally stimulated hydrogen desorption from zirconium and tantalum, 81
Thermochemical behaviour
mixed-ligand solid state complexes of cerium with bis-(2-ethylhexyl) phosphoric acid, 118
Thermodynamics
comparative solution chemistry of the 4f and 5f elements, 174
Thin film electrodes
amorphous La–Ni thin film electrodes, 6
Transformation temperature
variation in transformation hysteresis in pure cobalt with transformation cycles, L1
Transition metal compounds
comparison between Ce-monopnictides and An-monopnictides: strong mixing effect, 251
Transition metals
properties of Gd_3T compounds (T = Rh, Ir, Pd), 87
from the transition metals to the rare earths – via the actinides, 204
crystal and electronic structure connections between the 4f and 5f transition metals, 211
Transition pressures
comparative aspects of the high-pressure behaviour of lanthanide and actinide compounds, 216

Unstable ammonia
study of the formation of α-U_2N_{3+x} using unstable ammonia, 39

Volume stability
Mössbauer studies on the volume stability of f-electron configurations, 242

X-ray absorption spectroscopy
synchrotron X-ray absorption spectroscopy: a new tool for actinide and lanthanide speciation in solids and solution, 274
X-ray diffraction
crystal Structure of UAl_2 above 10 GPa at 300 K, 49
magnetic studies on Mn-substituted Y–Ba–Cu–O, 56
crystal structure of Ag_7Ca_2 – a new intermetallic structure type, 65
X-ray diffraction investigation of the defect pyrochlore $Bi_{1.61}Zn_{0.18}Ti_{1.94}V_{0.06}O_{6.62}$, 142
X-ray powder diffraction
subsolidus phase relations of the La–Co–Cu system and crystal structure of $LaCoCu_{12}$, 45
a new route for the synthesis of boron suboxide B_7O, L7

Yttrium
behaviour of interstitial impurities on the surface of yttrium during solid state electrotransport: Auger studies, 91
Yttrium nickel borocarbide
the preparation and characterization of a new layered yttrium nickel borocarbide, 53
Zinc oxide
a new route for the synthesis of boron suboxide B_2O, L7
Zirconium
thermally stimulated hydrogen desorption from zirconium and tantalum, 81
